

As the founder of Tripet Freight Consult Switzerland (TFCS), I have over 30 years' experience at senior level in international logistics, freight forwarding and supply chain management. I specialise in outbound and inbound transportation strategies, last-mile delivery solutions and branch establishment projects, which I deliver through strategic advisory and interim executive leadership services.

During my nearly two decades abroad, I have held key positions in the airline industry and the wider logistics sector, gaining first-hand experience in Europe, Asia, and the Middle East. This international background has given me a thorough understanding of the dynamics of global trade, cultural considerations and the operational complexities that influence supply chains.

I have collaborated with global shippers, freight forwarders, and airlines throughout my career, enabling me to integrate carrier, forwarder, and customer perspectives into pragmatic solutions that deliver measurable results.

At TFCS, I help organisations to achieve operational excellence, build resilient logistics networks, and navigate an increasingly complex and competitive environment.
